Please find the original document at <https://launchpad.support.sap.com/#/notes/2404051>

Symptom

Using the PA30, PA40 or any other HR transaction there is a long run time.

Environment

- Human Capital Management (HCM)
- SAP R/3
- SAP ERP Core Component
- SAP ERP
- SAP enhancement package for SAP ERP
- SAP enhancement package for SAP ERP, version for SAP HANA

Reproducing the Issue

A long run time appear when the execution of any of the HR transactions were the employee selection is involved.

Cause

This long run time in the system could be because some reasons:

1. The user is updated with the Structural authorizations.
2. The User has a big selection of employees into the Object Manager for the HR transactions.

Resolution

There are some actions that can help in this case.

1. Execute the report RHBAUS* as the note [2153561](#) describes to create the INDX table.
2. Use the report RH_DELETE_USER_SETTINGS with the settings:
 - Delete last object selection
 - Delete search variant
 - Delete object Manager attributes
